Profile

Thorough, meticulous, and proactive UI/UX designer who learns quickly, solves problems comprehensively, and evolves processes for efficiency. Experienced in collaborating with multinational teams and clients to pinpoint problems, gather requirements, and develop solutions.

Experience

UI Designer

CareerFoundry Bootcamp // 2020 - 2021

- Designed personal finance app focused on achieving savings goals.
- Created responsive recipe app for users new to cooking.
- Design critique sessions with mentors from Haddad & Partners and ModivCare.

z/OS Db2 Database Administrator

IBM // 2018 - 2021

- Own operational integrity of client databases by maintaining recoverability, availability, security, and performance.
- Designed, organized, and executed comprehensive training structure for new apprentices, introducing them to mainframe environments from ground up.

Public Health Data Assistant

Missouri State Public Health Lab // 2016 - 2018

- Recognized inefficiencies in existing pipeline for collecting and reporting test results. Proposed alternative solution that saved business unit over 96 working hours per month.
- Developed data entry protocols with supervisors for several types of test request forms received at laboratory.
